

# Flavorfile

The active component in this FlavorActiV™ Beer Flavour Standard is *cis*-3-hexenol

## FRESHLY CUT GRASS

### Associated terms

- Leafy
- Crushed green leaves
- Hedge cuttings

### Importance

A desirable character of some beers. Off-flavour at high concentrations.

### Origins

Several types of compounds impart freshly cut grass flavours to beer. Their presence is influenced by wort boiling practice and hop variety.

### Analysis

- Gas Chromatography

### Typical concentration in beer

Not applicable

### Approximate flavour threshold

15 mg/l

### Beer Flavour Wheel number

**0231**

### Remarks

*cis*-3-Hexenol is representative of compounds that impart freshly cut grass flavours to beer. It is not the sole cause.
