

# Flavorfile

The active component in this FlavorActiV™ Beer Flavour Standard is 2,6-dichlorophenol

## CHLOROPHENOL

### Associated terms

- Mouthwash
- Antiseptic
- Hospital-like

### Importance

Taint in beer.

### Origins

External contamination of brewing raw materials and/or packaging materials with chlorophenols. Contact of beer with chlorinated liquor.

### Analysis

- Gas Chromatography
- Colorimetric assay

### Typical concentration in beer

Not detected in normal beer

### Approximate flavour threshold

5 µg/l

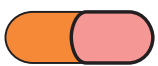

### Beer Flavour Wheel number

**0504**

### Remarks

Chlorophenol taints can be caused by several chlorinated phenols, of which 2,6-dichlorophenol is one.
